

The Securabike Advantage

Materials

Most Securabike bicycle parking products are available in either galvanised mild steel or stainless steel. Securabike utilises their own robotic cutting, welders and powder coating equipment to ensure a consistent, high quality finish to all of our products.

Stainless steel provides an attractive, durable, low maintenance and corrosive-resistant product. Securabike stainless steel products are normally supplied in Grade 304 (Schedule 10) although Grade 316* is available on request. Linished or electropolished finishes are available.

Securabike have developed a comprehensive 'care and maintenance' instruction booklet for all their stainless steel products. It is available free upon request, or can be downloaded from the Securabike website.

** Grade 316 stainless steel with electropolished finish, while more expensive, is highly recommended for installations within 2 kilometres of the coast to minimise the likelihood of tea-staining contamination on stainless steel finishes.*

Service and Maintenance

Every Securabike client is guaranteed of unrivalled service, advice and technical support, with in-house service technicians available to provide the ongoing back-up and maintenance required.

Securabike also has a selection of preventative maintenance programs that can be tailored to your product.
