

*Secure bicycle parking facilities at a 'park and ride' interchange*

### **More people are riding bicycles**

In the United Kingdom there are over 3 million new bicycles sold each year. Bicycles are used by a growing cross-section of people either as a means of transportation or for recreation.

It is estimated that nearly 1 million people commute to and from work by bicycle in the UK.

### **Cycling for transport and recreation**

Cycling is a clean and efficient mode of transport which is well suited for trips less than 5 kilometres, particularly in inner urban areas where roads are congested and parking spaces are at a premium.

Cycling also plays an important part in recreation within the community and is an excellent family activity for people of all ages. Estimates show that bicycle use in some cities is growing by more than 10% per annum, resulting in both state and local governments funding construction of thousands of kilometres of dedicated cycleways and shared paths.

### **Secure parking facilities essential**

Unfortunately, with this upsurge of bicycle use, there is an increase in bicycle theft and a need therefore, for professionally designed, secure parking facilities. In 2013 over 400,000 bicycles were reported stolen in the UK.

Securabike, with its proven background in mechanical and physical security products, has developed the Securabike range of rails and racks, lockers, cages and shelters that not only carry the Securabike style and appeal but are put together with security in mind.

More recently, Securabike has extended our range of products to include:

- End-of-Journey facilities
- Domestic Racks
- Bicycle Repair Stations
- Scooter Racks
- Bicycle Rack Hire
