You can now manage access and subscriptions to your bicycle cage online with the new Bikerost management system. One easy website allows users to login, pay or manage their access to a bicycle shelter or cage.

As an administrator you can control access and even billing! Not all cages charge for access so if you just want an easy online management tool for your apartment block or office then this is the tool you should consider.

The Bikerost system is smart with very little equipment needed at site. The over IP door controller needs to be connected to the internet by LAN or WAN and communicates directly with your account on the Bikerost server which you manage

online from anywhere. You can control all your users' access at any time and communicate with one or all at the drop of a hat. Save time and hassle by putting your bike cage management online.

While the system is ideal for use with Securabike's cages and end-of-journey facilities, you can connect to existing or underground sites just as easily – you just require a door with an electric strike and internet connection to make it work.

Other options include solar power operation, lighting, automated doors and much more. Contact your closest Securabike sales office today for more information.
