

UBC01
Module

Choice of mesh cladding

50 x 50 x 4mm galvanised wire mesh

71 x 9 x 4mm security mesh (higher anti-cutting protection)

Metal cladding on roof for above ground applications

Metal cladding to shower area

Pedestrian gate with magnetic lock and access control

The module can be supplied with roof and ceiling panels for above ground applications

Retro-fit Installation
There is a growing need to build or 'retro-fit' secure bicycle parking areas and change rooms, showers and the like to existing buildings. To avoid expensive building works, Securabike has designed a 'bike module' that can be used in both indoor and outdoor applications. The module is designed to fit into a single car space, and can be further expanded to occupy 2 or 3 car spaces.
Modules are supplied in kit form and can be quickly assembled once on site. A single car space can accommodate secure bicycle parking, change area, shower and clothes lockers for up to 10 cyclists. In outdoor installations modules can be fitted with green solar powered hot water systems and lighting.
